HOW TO COMPLETE YOUR VISITATION RECORD

Column 1: Unincorporated place and/or block number (if applicable).

Unincorporated place: This column must be completed in EAs that contain unincorporated communities. Show each unincorporated place separately by drawing a horizontal line across Column 1 above the number of the first household in the village or settlement and a horizontal line below the number of the last household. Enter the name of the place in Column 1, between these two lines.

Block number: If your enumeration map contains pre-numbered blocks, enter the block number in which each dwelling is located in Column 1. List all dwellings in one block before proceeding to the next block.

Column 2: Household number - The number printed on each line of this column identifies the household being enumerated.

Mail-back area - A sample household is designated by a shaded number. Each "shaded number" household is to receive a Form 2B questionnaire. All other households receive the Form 2A questionnaire.

Census area - All households will be enumerated on Form 2D questionnaires unless you are instructed otherwise by your Census Commissioner.

Column 3: Exact location of dwelling - In cities, towns and villages, enter the civic number, street name and street type. Enter the street direction and apartment number if applicable. In other areas, enter the civic address if possible. If not, leave the civic number column blank and enter the address components as per Examples of rural addresses for Column 3 found on this page.

Street name, type and direction - Enter as shown on the street sign using abbreviations where applicable.

For example:

Street direction - Enter only if part of the street name (for example, Laurier Ave. E). Enter the appropriate abbreviation E, W, N, S, SW, NE, etc.).

Apartment number - Refers to the number inside the building (e.g., 436 Roman Way, Apartment 2).

PRIVATE DWELLING TYPE CODES - DEFINITIONS
(TD box on front of Forms 2A, 2B, 2D and 4)

1. SINGLE-DETACHED HOUSE - A single dwelling not attached to any other dwelling or structure (except its own garage or shed). A single-detached house has open space on all sides, and has no dwellings either above it or below it.

A mobile home fixed permanently to a foundation should be coded as a single-detached house. (See Code 4)

Vertical division

2. SEMI-DETACHED HOUSE - One of two dwellings attached side by side (or back to back) to each other, but not to any other dwelling or structure (except its own garage or shed). A semi-detached dwelling has no dwellings either above it or below it and the two units together have open space on all sides.

Vertical division

3. ROW HOUSE - One of three or more dwellings joined side by side (or occasionally side to back), such as a town house or garden home, but not having any other dwellings either above or below.

Horizontal division

4. APARTMENT OR FLAT IN A DETACHED DUPLEX - One of two dwellings, located one above the other, but not attached to any other dwelling or structure (except its own garage or shed). The two units together have no other dwellings attached to the back, front, or sides, and have open space on all sides.

Horizontal and vertical division

5. APARTMENT IN A BUILDING THAT HAS FIVE OR MORE STOREYS - A dwelling unit in a high-rise apartment building which has five or more storeys.

Horizontal and vertical division

6. APARTMENT IN A BUILDING THAT HAS FEWER THAN FIVE STOREYS - A dwelling unit attached to other dwelling units, commercial units, or other non-residential space in a building that has fewer than five storeys.

Vertical division

7. OTHER SINGLE-ATTACHED HOUSE - A single dwelling that is attached to another building and that does not fall into any of the other categories, such as a single dwelling attached to a non-residential structure (e.g., store or church) or occasionally to another residential structure (e.g., apartment building).

8. MOBILE HOME - A single dwelling, designed and constructed to be transported on its own chassis and capable of being moved to a new location on short notice. It may be placed temporarily on a foundation such as blocks, posts or a prepared pad which may be covered by a slab.

A mobile home must meet the following two conditions:

- It is designed and constructed to be transported on its base frame (or chassis) in one piece.
- The dwelling can be moved on short notice. This dwelling can be easily relocated to a new location, because of the nature of its construction, by disconnecting it from services, attaching it to a standard wheel assembly and moving it without making to significant renovations and reconstructions.

9. OTHER MOVABLE DWELLING - A single dwelling, other than a mobile home, used as a place of residence, but capable of being moved on short notice, such as a tent, recreational vehicle, travel trailer or houseboat.
